

# ***PUBLIC HEARING***

**Noble County Plan Commission**

**Wed. Jan. 15, 2025**

**7:00 PM**

**(Solar moratorium is second item on agenda.)**

**Noble County Annex, 2nd floor**

**109 N York Street**

## ***What's at stake?***

**Noble County Commissioners initiated a proposal on December 16th, 2024, by a 2-1 vote, for the Plan Commission to consider a one (1) year moratorium regarding the Commercial Solar Overlay District, during which no project applications will be accepted. A moratorium could:**

- Delay utility/infrastructure development in Noble County
- Expedite the probability of brownouts while energy demands grow
- Extend the reliance on more expensive and volatile energy sources
- Delay the economic benefits of utility infrastructure development
- Risk missing out on favorable policies and incentives
- Increase community resistance and skepticism
- Risk stifling economic growth
- Risk falling behind in Indiana's and the nation's push for sustainable energy

***To move forward and thrive, we must remain open to innovation and development! Join us and tell the Plan Commission to vote "NO" on another moratorium and "YES" to progress!***
